

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	03 October 2022
Team ID	PNT2022TMID39479
Project Name	Project - - Digital Naturalist-AI enabled tool for bio diversity researches
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Google API
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Transactions	Through UPI, Credit/Debit cards and Net Banking.
FR-4	Authentication	<ul style="list-style-type: none">• Through OTP sent to mobile.• User created secured passwords.
FR-5	Authorization	Basic Authorization.
FR-6	Administrative Function	Adding, Updating and Maintaining description data about various species.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Our solution is demanded for scientific researchers Such as Ornithologists , Zoologists in order to predict and analyse about flora and fauna.
NFR-2	Security	Authentication process involves multilayer security to make user data and collected data more secured, also to avoid unknown authorization and data integrity issues. Most security methods include Encryption and

		Authorization
NFR-3	Reliability	Our framework should be reliable to cover wide range of species spanning across various habitats.
NFR-4	Performance	Data Augmentation to increase dataset size along with transfer learning to increase accuracy and performance for better working of application.
NFR-5	Availability	Our application possess full-time service (either offline or online) and dataset is constantly updated

NFR-6	Scalability	Our application supports large number of concurrent users without any hurdles or errors through scaled cloud resources.
